Introduction to Aquarius

Aquarius is the eleventh sign of the zodiac. It belongs to the element of air, which rules communication and the mental realm. Aquarius is a fixed sign, so moving forward can be challenging at times. Aquarius loves the unusual and the different.

Aquarius loves groups of people and has a strong yearning for friendship. Aquarius has huge compassion for anyone less fortunate. Despite being friendly, Aquarius also has the ability to detach.

The symbol for Aquarius is the water bearer and depicts a human pouring knowledge on to humankind. This sign is a humanitarian, independent and freedom loving. Aquarius is the sign of science and of genius. Aquarius is original and innovative.

A New Season ♊

At the beginning of the Aquarius season of 2022, we see the Sun, Mercury and Saturn in this sign. Mercury will retrograde back into Capricorn at the end of January. The Sun & Saturn are joined by the Moon on February 1st before she moves on. Mid February sees Mercury back into Aquarius.

During the time of the Sun in Aquarius, the energy externalises once more. We become more aware of the unusual and the different. We celebrate our friendships and are drawn to groups of people that we feel a connection with. We are more concerned with the collective, rather than ourselves. Our thoughts may turn towards helping those less privileged.

As the cosmic dance continues, only Mercury and Saturn remain in Aquarius when the Sun changes sign on February 19th.
